Lift Trolleys

EdmoLift's TZ-series is a series of stable Swedish manufactured trolleys and work tables. The trolleys are easily manoeuvrable and have a variety of different uses. TZ models can even be customised to suit the individual needs of the customers.

The platform and chassis are zinc-plated giving a stylish and extremely hardwearing finish. These lift trolleys are used wherever there is a need for lifting, assembly, transportation or where an adjustable working height is required.

With a variety of different models, with single and double scissors, a lift capacity from 200 kilos to one metric ton and a lift range from 920 mm to 1620 mm, we can offer a wide range of lift trolleys.

The trolleys are available with a foot pump or battery-driven, with an integrated battery and charger. Large, easily manoeuvred wheels with double brakes on the swivelling wheels make the trolley safe and easy to manoeuvre.

Product features lift trolley

- Load capacity max 1000 kg.
- Zinc-plated lift table and chassis give an unrivalled surface finish and durability.*
- Easy to manoeuvre.
